

AF250

Benchtop Bottling Machine Specification

freshcraft™ TECHNOLOGY

Protect your beverages with ACOS Filler Limited's patented **freshcraft™** technology.

Packaging beverages with ultra-low oxygen pick-up can extend shelf-life by preserving fresh flavours and aromas for longer.

Consistent CO₂ levels are a major contributor to mouthfeel & taste. Under-carbonation from CO₂ losses using conventional fillers can result in beverages that are perceived as 'flat' and overly sweet.

freshcraft™ technology delivers consistent CO₂ levels and has integrated capping so that your product is protected from oxygen ingress between filling and 26mm crown-capping*.

(*A dedicated AF250 Machine variant for 29mm crown caps is also available)

DUAL MODES

PRODUCTION MODE: 250bph

Production mode enables you to bottle and your product fast* with less than 40ppb (parts per billion) Oxygen pickup per fill.

* (up to 250qty 330mL bottles per hour)

COMPETITION MODE

You have crafted the perfect beer and deserve a medal!

Use competition mode to ensure your award entry has near-ZERO* ppb oxygen-pickup.

*(Less than 15ppb)

KEGS/ BRITE TANKS

Supplied standard with a D-Type Keg coupler, ready to bottle from a keg with minimal setup.

A Brite-tank bottling kit is available separately.

CIP/ SIP

Designed for CIP (Clean in place) and SIP (Sterilise in place).

MULTI-FIT BOTTLE SIZES

Supplied with a base plate to suit most standard bottles up to 500mL (17 fl. oz.) An XL base plate is available to suit bottles with larger diameters (> Ø72mm) or larger volumes.

Adjustable to suit most bottles shapes and heights between:

195mm - 305mm
(7.7") - (12.0")

DIMENSIONS:	1200mm / 47.2" (Height) 262mm / 10.3" (Width) 347mm / 13.7" (Depth - Cabinet Base)
MOUNTING:	Secure to a sturdy, dedicated workbench (600mm 24" minimum benchtop depth) with 4qty M8 Bolts.
ELECTRICAL:	Included 24vDC Adapter requires 100-230vAC 10A (Single Phase)
COMPRESSED AIR:	90PSI (@compressor)
COMPRESSED AIR:	80PSI (@ AF250)
CO₂	20PSI (Dedicated Regulator)
